

“BDRK” “BDBK-2” LATCH

The **1-1/2 inch BDRK Latches** are designed for installation in G-type pocket profile side pocket mandrels.

They utilize a locking ring which is held in position by spring force.

As the latch enters the side pocket profile, the locking ring moves up and into the recessed area of the latch.

When the latch seats, the ring is positioned in the locking recess of the pocket.

To retrieve the latch, a pin is sheared by upward force allowing the locking ring mandrel to move up and out of the way.

The ring is then freed to disengage from the locking recess as the valve and latch are retrieved.
