

“BDPRS” PULLING TOOLS

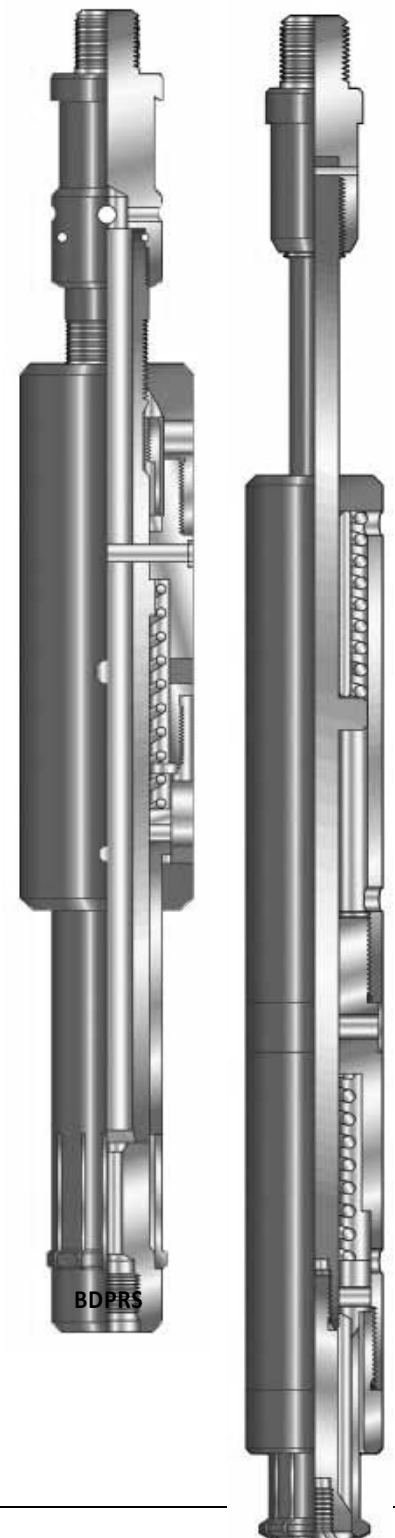

The “**BDPRS**” **Pulling Tools** are wireline service tools that are used to retrieve sub-surface devices with internal fishing necks. The BDPRS pulling tool consists of a fishing neck with threaded pin connection on the top, an inner mandrel, a collet, a collet core and either a core spring (BDPRS-2 and BDPRS-3) or a ratchet assembly (BDPRS).

The BDPRS is designed for use with only the BDDB locks, BDPRS-2 for use with C lock system (with internal fishing necks) and the BD-PRS3 is designed to retrieve D collar locks.

The BDPRS Pulling Tool has a jar down to release feature and a collet to hold the tool in the release position.

The BDPRS-2 and BDPRS-3 pulling tools can be jar up or jar down to shear depending on how they are assembled. These feature a spring to hold the tool in the release position once the pin is sheared.
