

Half Moon Sheave

The **BDWS Half Moon Sheave** also known as an Arch Sheave is designed specifically to be used for large sheave diameter application.

The Half Moon Sheave is used to run control line or encapsulated ESP cable/line. The sheave groove can be designed to match the line size.

This Half Moon Sheave used as a top block and can be secured by chain or rope as necessary.

Currently, the Half Moon Sheave available sizes range from 24" to 48" diameter.
