

## Measuring Head

The **BDWS Measuring Head** is designed and manufactured to suit most wireline units.

The Measuring Head operates with a simple wrap around system, controlled with the use of pressure wheels.

The Measuring Head measures the wireline as it enters the well giving a depth measurement at surface via a vendor root counter.

Metric and imperial measuring is available. A dual wire size is also available.

16" Sheave Wire Size	20" Sheave Wire Size
0.108" Imperial	0.108" Imperial
0.125" Imperial	0.125" Imperial
0.108" Metric	0.108" Metric
0.125" Metric	0.125" Metric
